

Weekly Report 2019.09.09-2019.09.15

Jingtun ZHANG

WHERE WE ARE:

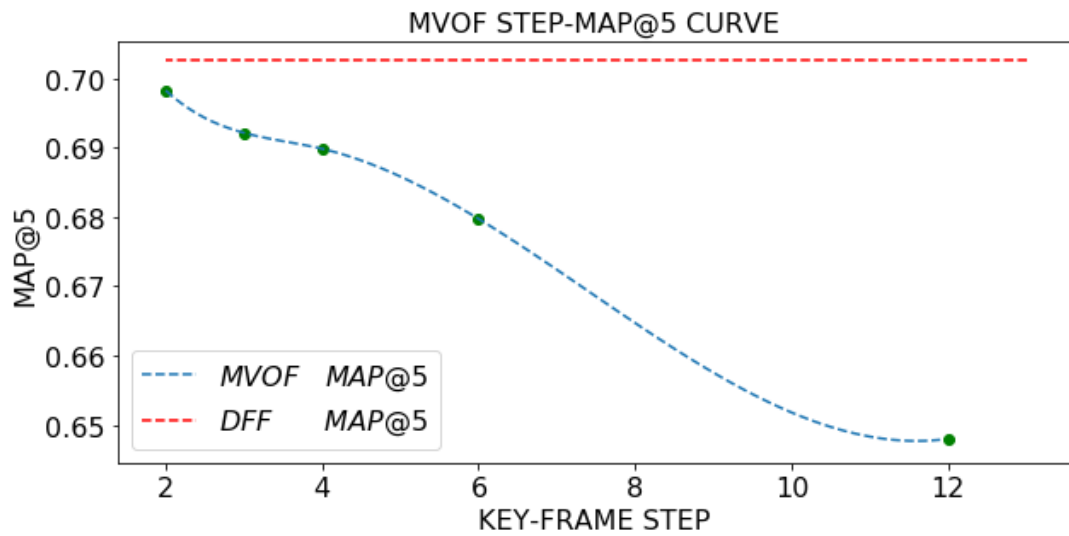

JINGTUN ZHANG SUMMER INTERNSHIP AT UCSB					
TIME	DFF MODEL	HAG	GNN	GDyNet	Quantum
2019.08.19 ----- 2019.08.25	<div>Coding and Debugging of MVFF-ObjectDetectionn-Version3</div> <div>Paper-reading: DMC-Net MVFF-Version4 in coding</div>				
2019.08.26 ----- 2019.09.01	<div>MVFF-Version3 result: MAP@0.5 on 2 gpu 3 epoch: 0.6163, modification of Version3 is running now</div> <div>Residual getting from Data set for preparation MVFF-Version4</div>				
2019.09.02 ----- 2019.09.08	<div>MVFF-Version4 in coding</div> <div>Version4-without optical flow guidance: MAP@5 = 0.5091</div> <div>Modified Version3 with Pooling-Version2 res-connection: MAP@5 = 0.5984</div> <div>Optical flow extracting</div>				<div>Quantum Programming reading and QCEngine program learning</div>
2019.09.09 ----- 2019.09.15	<div>MVFF-Version3 Final MAP@5 = 0.6225</div> <div>TLV1 optical flow extraction: too slow to use, Try DFF-Flownet optical flow extraction just for comparison with motion vector</div> <div>MVOF Step-MAP@5 Curve</div>				<div>Paper review of A Modern Survey of Quantum Programming Languages and Frameworks</div> <div>Textbook Reading</div>

Work and Progress

2. 🤖 Result of Final Modified MVFF-Version3: MAP@5 = 0.6225, just approximate MVFF-Version2 with residual bind.
3. ✂ : Data Preparation for V4: extracting TLV1-flow from dataset: Too slow to use, replaced by DFF-FlowNet flow extraction: Just for comparison with motion vector: DFF in training now
4. 😊 : MVOF Step-MAP@5 Curve:

STEP	2	3	4	6	12
MAP@5	0.6982	0.6921	0.6898	0.6797	0.648

5. 📖 Learning of Quantum Programming: Reading 《Programming Quantum Computers: Essential Algorithms and Code Samples》 and learning QCEngine program

[Reading_Note](#)
